How do we want to live our lives?

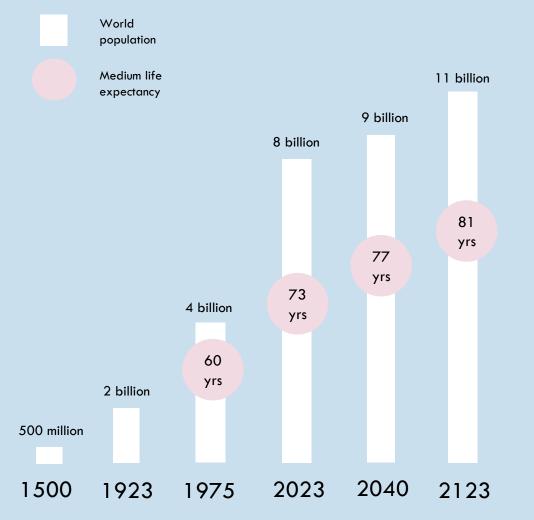

"The best way to predict the future is to create it. What thoughts do you want to fire and wire in your brain?"

Dr. Joe Dispenza

The world population has grown from 2 to 8 billion in 100 years

Source: worldometers.info, Macrotrends.net

"Ultimately, human beings will not be the driver of the planet as we have been accustomed to being."

"Al is already our best friend. Think about how much time each day you spend looking at your screen. It is already way more time than you spend with another human."

Mustafa Soleyman, Co-Founder DeepMind

What will the media landscape look like?

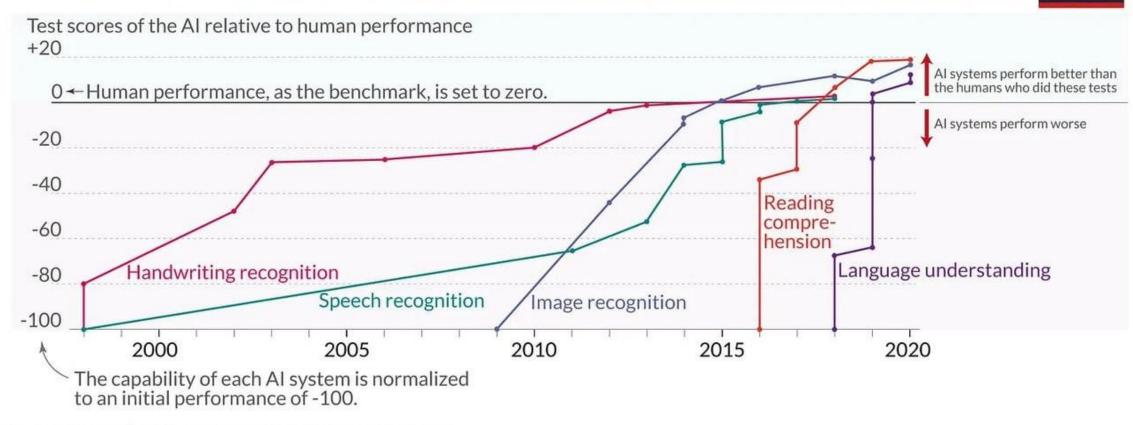

-> Flexibility, speed and new-ways-of-thinking are keys to success

Why all the buzz about Al right now?

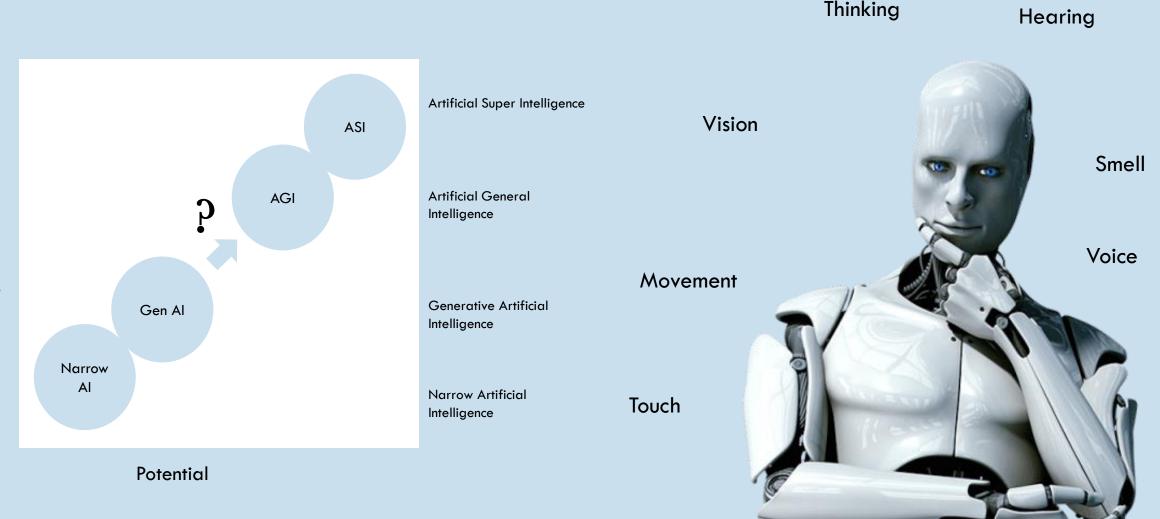

Language and image recognition capabilities of AI systems have improved rapidly Our World

Data source: Kiela et al. (2021) – Dynabench: Rethinking Benchmarking in NLP OurWorldinData.org – Research and data to make progress against the world's largest problems.

MIT's definition as AI – "How close or how well a computer can imitate or go beyond, when compared to a human being"

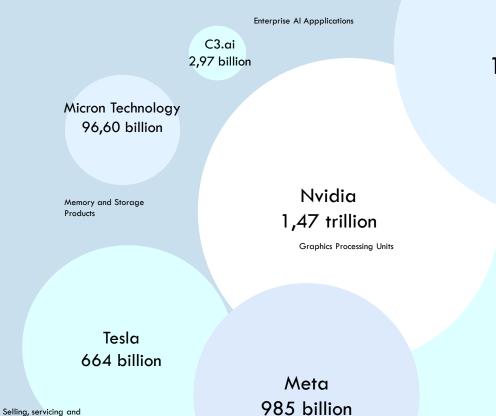

The two most important differences between Al and earlier technological breakthroughs

- 1. AI is programmed to make decisions by itself
- 2. AI is creative and can come up with things humans can not foresee

Yuval Noah Harari, AI, Democracy and the Future of Civilization 230524

Which players are leading the development right now?

charging electric vehicles

985 billion

Alphabet 1,84 trillion

Amazon
